QUALITY AND SIMPLICITY

www.hy-pro.nl - info@hy-pro.nl

LET OP

- Mix A met water, roeren, mix B in dezelfde hoeveelheid en roer opnieuw.
- Controleer je EC (tussen 1.4 en 2.2).
- Controleer je pH (tussen 5.5 en 6.0).
- Advies temperatuur (tussen 24 °C en 29 °C).
- Luchtvochtigheid: (begin met 80%, afbouwen naar 40%).
- Kijk ten alle tijden naar de plant, deze geeft zelf aan wat deze nodig heeft.

ATTENTION

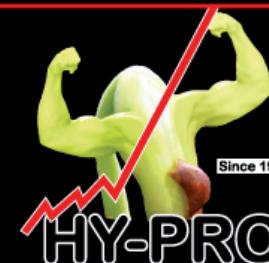

- Mélanger A avec de l'eau, puis mélanger B dans la même quantité. Très bien mélanger.
- Controler la CE (entre 1,4 et 2,2).
- Controler le pH (entre 5,5 et 6,0).
- Température conseillée (entre 24°C et 29°C).
- Humidité (commencez avec 80%, puis réduire à 40%).
- Tenez compte de la plante, souvent elles vous indiquent ce qu'elles ont besoin.

ATTENTION

- First mix A with water, stirring, then mix B in same amounts, stir again.
- Check your EC (1.4 and 2.2).
- Check your pH (5.5 and 6.0).
- Advice temperature (min 24°C and max 29°C).
- Humidity: (start with 80%, reduce till 40%).
- Look at all times to the plants, it indicates itself what it needs.

ACHTUNG

- Mischen sie A mit Wasser, danach rühren, und mischen sie B in die gleiche Menge und rühren sie erneut.
- Kontrollieren sie die EC (zwischen 1,4 und 2,2).
- Kontrollieren sie die PH (zwischen 5,5 und 6,0).
- Die empfohlene Temperatur (zwischen 24°C und 29°C).
- Luftfeuchtigkeit: (fangen sie mit 80% auf und bauen sie bis zu 40% ab).
- Achten sie auf die Pflanze, es wird zeigen was es nötig hat.
